

Robert Hadden Jr. — Resume

Robert Hadden Jr.

AI/LLM Engineer · Automation Architect · Indie Media-Tech Founder

Remote · respectfulnrespected59@gmail.com · github.com/respectfulnrespected59-source

Summary

AI/LLM engineer operating production multi-agent pipelines daily. Founder of Quantum Melanin Media (QMM), an indie media-tech studio that ships open-core developer tools, AI-generated long-form video, and direct-to-consumer digital products. Fluent across the modern AI builder stack — Claude Code SDK, Agent SDK, MCP servers, hooks orchestration, and 130+ custom skills in active rotation. Deep practical Playwright + Python + ffmpeg automation experience across YouTube, Gumroad, Kling, Higgsfield, and self-hosted infrastructure (n8n, Supabase, Ollama, ComfyUI, RunPod). Open-source author with shipped tools and a coherent self-hosted SaaS stack architected for a media business.

Core Competencies

AI / LLM Engineering — Claude Code SDK, Anthropic Agent SDK, Claude Skills authoring (130+), Hooks system (PreToolUse / PostToolUse / Stop), MCP server consumption + authoring, multi-agent orchestration, prompt engineering, drift-aware prompting, model selection strategy (Haiku / Sonnet / Opus), extended thinking control

Languages — Python, TypeScript, JavaScript, Bash, PowerShell, Go (reading), Rust (reading), Dart (reading)

Automation & Pipelines — Playwright (production browser automation with anti-bot pacing guardrails), Python pipelines, ffmpeg orchestration, Manim animation, Remotion programmatic video, DaVinci Resolve scripting, build/upload/post pipelines

Infrastructure & Self-Hosting — n8n, Supabase, Ghost, Coolify (PaaS), AppFlowy, Listmonk, Plausible, Penpot, Cal.com — full self-hosted SaaS stack architected and deployable. RunPod cloud GPU rigs (RTX 4090/5090) running ComfyUI + Ollama + n8n + Qdrant

AI Media — Kling 2.5 Turbo / Omni / Avatar 2, Higgsfield (Wan 2.7, Nano Banana 2, FLUX.2), Hailuo, Seedance, Suno, ElevenLabs, F5-TTS, Kokoro TTS, XTTS-v2 voice cloning

Security-Adjacent — OWASP Top 10 awareness, secret management (.env discipline, no-commit hooks), code review workflows (security-reviewer agent), Playwright stealth + anti-bot evasion patterns, MCP server boundary hardening

Product Ops — Gumroad full-funnel (cover art generation + listing automation + 40+ shipped SKUs), YouTube full-funnel (build → encode → upload → metadata), GitHub release management, AgentShield 100/100 audit-cleaned public repos

Experience

Founder & Sole Operator — Quantum Melanin Media (QMM) · 2025 – Present · Remote

Run a vertically integrated media-tech studio shipping books, comics, AI tools, generative video, and a multi-agent digital company stack. Sole technical operator across product, infrastructure, content, and distribution.

AI / Engineering - Architected QMM Stack — four-agent digital company (Quantus / Quanti-Code / Quanta-Clause / Quant-Ology) operating across skills, hooks, rules, and persistent memory layers. Published on GitHub. - Authored and maintain 130+ Claude Code skills covering video pipelines, image generation, voice cloning, post-production, social posting, and security review. - Shipped **KAREN** — open-core Python tool that detects manuscript structural typography damage (orphan fragments, false-bold sentences, buried headings, merge bugs) across DOCX / PDF / Markdown. Published with permissive license on GitHub. - Built quantus-autoposter — Python + Playwright pipeline that builds, encodes, captions, and uploads multi-format ads to YouTube + X. Handles OAuth, FFmpeg, MoviePy, and resilient upload retry logic. - Designed water-flow prompt chaining system for end-frame continuity across 5-second AI video clip sequences (killed “AI-slop” gaps between clips in production). - Authored cinematic post-production pipeline locking Higgsfield generation → ffmpeg blocking → Kling extend → DaVinci Resolve finishing as the standard workflow.

Infrastructure - Architected self-hosted SaaS stack for QMM: Ghost (publishing), n8n (automation), Supabase (data), Coolify (PaaS), Penpot (design), AppFlowy (workspace), Listmonk (email), Plausible (analytics). All forked, branded, and prepared for self-host deployment. - Operated RunPod RTX 4090/5090 cloud GPU rentals running ComfyUI + Ollama + n8n + Qdrant for local AI generation and RAG at ~\$25/month variable cost.

Product / Distribution - Shipped 40+ SKUs to quantummelaninmedia.gumroad.com spanning books, comics, AI tools, and digital courses including Bloodline novella, Sea Moss Unveiled, The 42 Laws of Maat for Kids, KAREN tool license. - Built and ran YouTube production pipeline. Most recent: *QMM Lions Podcast: The Stolen Quantum Engine* (16:11 long-form with Wan 2.7 lip-synced hook + custom audio pipeline). - Designed cover art batch generation (make_10m_covers.py family) producing on-brand merchandise art using PIL + AI image gen at zero per-unit cost.

Independent AI Research & Tooling · 2025 – Present · Remote

- Maintain quantus-ai — TypeScript application work
- Maintain quantus-manim, quantus-remotion-swarm — parallel-render video generation pipelines
- Maintain higgsfield-autopilot fork for batch generation orchestration
- Maintain the-melanin-guardians- — IP repository for ongoing comic line

Selected Open-Source Projects

KAREN — *Python · DOCX / PDF / Markdown* Open-core manuscript structural typography scanner. Detects orphan fragments, heading merge bugs, false-bold sentences, buried headings. Production-tested on QMM's own manuscript inventory. github.com/respectfulnrespected59-source/karen

QMM Stack — *JavaScript · Skills + Agents + Rules + Memory* Four-agent digital company architecture for Claude Code. Quantus (CEO), Quanti-Code (CTO), Quanta-Clause (COO/open-source), Quant-Ology (theorist). 1 GitHub star. github.com/respectfulnrespected59-source/qmm-stack

quantus-autoposter (*private — viewable on request*) Python + Playwright pipeline for multi-format ad generation, encoding, captioning, and automated upload to YouTube + X. OAuth, ffmpeg, MoviePy.

Self-Hosted QMM Infrastructure Stack — *Architecture + Customization* Coordinated forks of Ghost, n8n, Supabase, Coolify, Penpot, AppFlowy, Listmonk, Plausible, Cal.com — branded and prepped for unified self-host deployment.

Selected Skills (130+ Claude Code Skill Library)

- kling-video-3, kling-element-library-3, kling-video-3-omni, kling-avatar-2
- higgsfield-scene-remix
- manim-explainer-video
- water-flow-prompt-chain (continuity engineering)
- three-beat-action-chain (motion choreography)
- gumroad-product-images (Playwright upload automation)
- local-voice-cloning (F5-TTS / XTTS-v2)
- kokoro-tts-audiobook
- hailuo-video-gen
- noelle-randall-financial-literacy (50-video synthesis KB)
- remotion-video-creation
- Custom python-patterns, golang-testing, security-review skill packs

Full catalog organized by category: video generation · image generation · voice / audio · post-production · automation · platform integration · product ops · security review.

Education

Continuous self-directed learning. Documentation, primary vendor docs, GitHub source, hands-on production builds.

Working Style

Ship-first. Truth in framing. Quality gates before deploys. Multi-agent orchestration with clear org chart. Per-project change-log discipline (every mid-flight pivot is locked to a brief with verbatim quotes). Async-friendly, comfortable as sole-operator or embedded in cross-functional team.
